

Geography

Intent

HEBBURN
Comprehensive School

WORK HARD | BE KIND | ASPIRE

In Geography, our intent is to promote a curiosity and fascination about the world and its people that will remain with pupils for the rest of their lives and encourage them to travel beyond their own doorstep and respect other people and their cultures. Geography is, by nature, an investigative subject, which encourages pupils to enthusiastically explore and question the world around them. The curriculum promotes their interest and understanding of diverse places, people, resources and both natural and human environments together with a deep understanding of the Earth's key physical and human processes. As pupils progress, their growing knowledge and understanding of the world and their development of geographical skills should help them become global citizens who can critically evaluate geographical issues and ideas and live more sustainably in a complex and ever-changing world.
