

Textiles

Intent

HEBBURN
Comprehensive School

WORK HARD | BE KIND | ASPIRE

The intent of the Textiles curriculum is to provide a comprehensive and engaging education that equips learners with the knowledge, skills, and understanding needed for success in the field of textiles. We aim to foster creativity, critical thinking, and problem-solving abilities while promoting a passion for textile design and an appreciation for its cultural and historical impact. Our intent is to empower learners to become confident, independent learners who are well-prepared for further study or potential careers in the textile industry. Learners embark on a journey that explores various textile techniques, including printing, embroidery, tie dyeing, use of the heat press and fabric manipulation. Our curriculum not only emphasizes technical proficiency but also encourages learners to express their unique ideas through their creations. Through hands-on projects, collaborative learning experiences, and exposure to diverse textile traditions, learners develop a comprehensive skill set that prepares them for a world where the intersection of art and design is ever evolving.

As students transition from KS3 to KS4, they are increasingly able to investigate and explore ideas, critique and refine their work and respond in a meaningful and personal way to the themes and briefs set for them. More importantly, they can do so competently and independently.
